SUPERVISORY PATENT EXAMINER

All claims pending thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided in the paragraphs, which follow below.

REASONS FOR ALLOWANCE

Claims 1-10 are allowed.

The instant application is deemed to be directed to nonobvious improvements over the invention of Sawada et al (U.S. 6,431,714 B1) as being a representative example in the art to which the instant invention pertains. In particular, said improvement provides a MEMS two dimensional mirror with articulated suspension structures for high fill factor arrays including almost negligible coupling between two tilt axes, inexpensive and simple control and fabrication processes.

More specifically, independent claim 1 is drawn to a MEMS mirror device comprising a 2-dimensional and 1-dimensional rotational articulated hinge at respective ends and a movable cantilever connected to the mirror through the 1-dimensional hinge as claimed, specifically whereby movement of said cantilever causes rotation of the mirror in a first axis of rotation, and the mirror is also rotatable about a second torsional axis of rotation perpendicular to said first axis of rotation. (Claim 1, lines 8-10).

Similarly, independent claim 25 is drawn to a 2-dimensional rotational articulated hinge having first and second 1-dimensional rotational articulated hinges having respective first ends connected to a support structure and second ends connected to each other as claimed, specifically further comprising a third 1-dimensional rotational

articulated hinge having a first end connected to the second ends of the first and second articulated 1 dimensional rotational hinges and having a second end for connection to the device to be rotated (Claim 25, lines 9-11).

The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

OTHER REMARKS/INFORMATION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
